The Order is making such material available in our efforts to: Advance the Understanding of the Science of the Natural World, Technology, Promote the Progress of Science and the Useful Arts, Dissipate Ignorance, Educate the People, and to Dissipate Myths. We believe this constitutes a "fair use" of any such copyrighted material as provided for in Title 107 of the US Copyright Law, in accordance with Sections: 107, 108(h). All proceedings from the book goes to charity.

Without Him to lead, and the Team to help, this and all other Books, that have been published by the Order, could have not been written, in a speedy way, that they have been. For the task at hand, is enormous, and the days and nights, I have denied myself, this in and for the benefit of others. For the help, of he who is in need of it. And also that man may know that He, indeed, is mindful of each one of you. Seek Him, and Glorify Him, for He Is Thy God and Saviour.

ISBN:

First Edition: 2023 Book Nº

In Gratitude To

This Book is dedicated to the following:

To the God of Abraham: Who Is The God of Humankind, Our One and Only Lord and Saviour The Christ.

We Dedicate this Book to: to all those who have perished at the hands of ignorant men; To all those Wise Men who understood the difference between what is right and what is wrong; To those wise ones, who are ever present and let not fall civilization.

"The Lord He is God"

Has in the Oneness of the Living God the Christ Our Lord and Saviours, so it is in the oneness of comprehension and understanding in which those points of truth these authors all conclude and agree upon.

And as a result on which they all agreement this book is produced and given as a testimony that: "The Lord He is God", and the Lord walks with us everyday, even if you do not see Him, He is with us, He is with those who ask for Him for the Lord Is God of Humankind.

These are not vain words, but are those words from those who know The Lord, His Ways, His Coming.

And many others whose names do not appear here but they know who they are.

To all physicians, whose convictions regarding the soundness of principles set forth in this work, and whose fearless advocacy of therapy based on these principles have been a constant source of encouragement and inspiration to many, this book is also dedicated.

Acknowledgements

The collective knowledge generated from academic research summarized in various references has been critical in the creation of this published work, which is best viewed as a comprehensive compilation and collection of published information by many authors throughout the ages, as well as personal and clinical experience in the treatment of self and others.

This work was possible only by the guidance and Light of Christ who Is God.

A special thanks also to those who work with Him and help all of us.

May each individual be able, to find this eternal truth, while on earth.

Credits and References

Although all credits and references where given to the best of our knowledge and information contained in the central archives of the Hospitallers Order of the Good News.

If there is any errors or mistakes we kindly ask the reader to allow the knowledge of such items in order to rectify same in future editions of the present Book.

Health and Therapeutic Journals and Books

The present work rests upon the foundations of those civilization luminaries, men and woman of exceptional talent, intuition, and detailed observation.

Furthermore it was a privilege to us, for them to have the dedication and time to write and publish their clinical findings. There is then a vast amount of Journals and Books devoted to the Health and Therapeutics. Of these printed records those from 1850 to 1950 in this 100 year period we specially encounter that the majority of what is to be known concerning disease its origin and its treatment and cure,

where in fact correctly identified. These records, in their collective, contain timeless observations of which many remain permanent truths.

These pearls are hidden from plain sight, only the adept or the initiated can identify them and pick one by one, from the surrounding confusion.

Sources

This book is a Record of the clinical findings of many great Health Practitioners, their findings remain the same throughout the centuries. All share the same conclusion.

The Truth is in plain site.

Apart from the Archives of the Hospitallers Order of the Good News Library, we are also very grateful to all libraries, who have kept books for the last 200 years, those of which by their keeping allowed the information on those books to survive, and be upon their withdrawn from their keeping available to purchase by the Order, and kept in its Archives and Library.

The Hospitallers Order of the Good News, has therefore obtained many of this rare Books, many of which are not available, nor found in libraries, for this we thank The Lord who Is God, for having placed the same in keeping of the Order.

Errors & Omissions

Although the editor, publisher have made every effort to ensure that the information in this book was correct at press time, the editor, publisher do not assume and hereby disclaim any liability to any party, for any loss, damage, or disruption caused by errors or omissions, whether such errors or omissions result from negligence, accident, or any other cause. Much care was taken to avoid any errors or omissions, if any do exist, please let us know, in order to correct same in any future editions.

Dedication

*"**To the victims, past and present, rich and poor, of Adulterated Food, Patent Medicines, Compulsory Vaccination, Abuse of Surgery,** booze-guzzling, industrial diseases, autocracy of dress, false modesty, sex ignorance, and conventional hypocrisy; **to those, who never had a real opportunity to learn the truth, being kept in ignorance through the vicarious and popular channels of misinformation.***

To those, whose nerves, muscles, bones, marrow, and blood have been converted into dollars, and cents under, the iron heel of commercial greed, in the name of health, science,** and benevolence; to those, whose inner and better selves remain crushed and stifled as a result of monotonous, loveless lives, tyrannical and fanatic parents, and uninspiring surroundings in general; to the patient "sons of toil", who constantly undermine their health and risk their lives, making it possible for us to appreciate art, music, literature, culture, and invention that the genius of human brain has brought forth, yet have for themselves little in return, save fatigue, **malnutrition, soul-starvation,** anxiety, fear, **filth and premature death.

To all these victims of our seething, restless, debauching, artificial, and health-wrecking era, impudently labelled "civilized".

I affectionately and hopefully dedicate this book."** - Dr Simon Louis Katzoff, MD, in **"Timely Truths on Human Health", 1921.

*"**The present work is written for the double purpose of correcting error, and imparting truth.** Its purpose is not to attack men, nor systems, **but simply to state facts by which their pretensions may be judged."** - Dr Frederick Hollick, MD in "Neuropathy, or The true principles of the art of healing the sick", 1847.*

Disclaimer

"The content of this Book, is based on research conducted by the members of the Hospitallers Order of the Good News, unless otherwise noted. The information is presented for educational purposes only, and is not intended to diagnose or prescribe for any so-called "medical" or "psychological" "condition", nor to prevent, treat, mitigate or cure such "conditions". The information contained herein is not intended to replace a one-on-one relationship with a qualified healthcare professional.

This information is not intended as "medical" advice, but rather **a sharing of knowledge and information based on research and experience.**

The Hospitallers Order of the Good News, encourages the reader to; "Make your own health Care decisions based on your judgment, and research in partnership with a qualified Health Care Professional."

But be aware of not choosing, the Medical Trade, for Health Science and Medical Science are two different things.

These statements have not been evaluated by the so-called Food and Drug Administration, in the USA.

The information on this Book is not intended to diagnose, treat, cure or prevent any disease, by means used by the Medical Trade.

As sad it may be, that one is forced to place such a disclaimer, just serves to illustrate the state where the present civilization is at the moment.

A civilization founded on lies, has no future, a civilization based on false or fake pretences, has no future, a civilization that follows political correctness is fake by proxy.

To sustain the manner of thinking in the present civilization is to sustain a lie.

Thus the solution is to establish a New Civilization, based on a New Science. This if Humankind will ever have a chance to progress in this third dimension on Earth.

In that the End of Times and the Beginning of a New Era, 2023.

Introduction

"Beware of false prophets, which come to you in sheep's clothing, but inwardly they are ravening wolves.
Ye shall know them by their fruits.
Do men gather grapes of thorns, or figs of thistles?
Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit.
A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." *- Matthew 7:15-17*

"But there were false prophets also among the people, even as there shall be false teachers among you, who privily shall bring in damnable heresies, even denying the Lord that bought them, and bring upon themselves swift destruction.
And many shall follow their pernicious ways; by reason of whom the way of truth shall be evil spoken of.
And through covetousness shall they with feigned words make merchandise of you." *- 2 Peter 2:1-3*

"Too often medical organizations, as well as individual physicians, have taken the position that they were the courts of last resort; that it was their special function to dictate the terms of public health legislation, and that it was the duty of the public to accept their decisions and acquiesce in their judgment." - Dr Frederick R. Green, AM, MD, Secretary, Council on Health and Public Instruction of the American Medical Association., in "American Journal of Pharmacy", June 1915.

"The responsibility of protecting the public from disease and of securing better health conditions belongs to the people.

It is not the function of the medical profession to maintain lobbies or to endeavor to secure public health measures by political methods.

The true function of the medical profession is to advise the people, to show them how to protect themselves.

The doctor's mission is to be a teacher and not a political manipulator.

The responsibility for public health conditions must rest with the people and not with any special class or profession.

The sooner these general principles are recognized, the better it will be for the medical profession and for public health advancement." - in "JAMA", 25 February 1919.

"Unless the drift toward Bureaucratic Government is stopped, Americans will be the most ruled and standardized people in the world, and we will need armies of citizens to enforce all the laws; by and by we shall all be government employees, earning our pay by watching one another. Then, surely, the millennium will have been reached." - in "Illinois Medical Journal", Congressional Digest, August-September 1935.

March 2020

"The moral of Coronavirus19 will be that social contagion via social networks is more dangerous than biological contagion." *- Dr Mark Changizi, Professor of Cognitive Science, in "Twitter", 17 March 2020.*

April 2020

"Lockdowns were not common sense measures. They were hysterical reactions out of fear." *- Dr Mark Changizi, Professor of Cognitive Science, in "Twitter", 27 April 2020.*

May 2021

"Criminal charges have been filed against Martin Ackermann, the head of the Swiss National Covid-19 Science Task Force *and "possibly other parties involved",* ***for deliberately and successfully frightening the population in accordance with Art. 258 of the Criminal Code."*** *- Dr Mark Changizi, in "Twitter", 14 May 2021.*

November 2021

"Covid revealed two kinds of people. Those who learned the value of civil liberties, and those who did not." *- Dr Mark Changizi, in "Twitter", 4 November 2021.*

August 2023

"Covid was not a threat to nearly every working age person. The interventions were not standard practice. The interventions had massive harms. Much of the excess deaths are due to the interventions themselves." *- Dr Mark Changizi, Professor of Cognitive Science, in "Twitter", 4 August 2023.*

Erroneous Principles of Public Health Policy

"According to Dr I. M. Rubinow, "the medical profession is the guardian of the public health."

This view is certainly not shared by those who represent federal, state, county or municipal health activities.

Sanitary science and preventive medicine are fundamentally separate and distinct from the practice of medicine as a healing art.

It would be a lamentable confusion of functions and duties if the view were to gain general acceptance that the medical profession, as represented by practicing physicians and surgeons, is to be considered "the guardian of the public health." - Frederick Ludwig Hoffman, LL.D., Statistician, Member German Society for Insurance Science ; Associate Fellow American Medical Association; Member American Association for the Advancement of Science, in "Facts and fallacies of compulsory health insurance", 1917.

State Medicine A Menace To Democracy

"This book presents a disinterested analysis of erroneous principles of public health policy.

It points out the serious consequences of allowing these erroneous principles to play such a prominent part in the shaping of our public health activities.

It calls attention to the enormous appropriations now being made for alleged public health activities and their tendency to increase in size.

It explains the seeming paradox that the larger these appropriations become the greater the failure to conserve public health and the more the enjoyment of "life, liberty and the pursuit of happiness" is being taken away from the American people.

It discusses the evils of state medicine in a general way and also under special subjects including the following, "Fallacy of Plea for Medical Control Through Medical Practice Acts", "Medical Examination of School Children

Ineffective and in Many Cases Actually Harmful" and "Compulsory Vaccination Is Based Upon Superstition, Commercialism and Paternalism."

Based on a painstaking study of the most important official documents and periodicals issued by health departments, leading medical and sociological organizations and other publications bearing on the subject of public health." - in "State Medicine a Menace to Democracy", 1920.

"The Texas Medical Practice Act, which became a law in 1907, is designed to avoid this contingency, and the fact that the medical profession has loyally supported that act is proof that they have no desire **to dictate to the people of Texas how disease shall be treated, or to control by law the teaching and practice with regard to the management of the sick and injured.**

Under the Medical Practice Act, any man may engage in the treatment of the sick, by any method that may seem good to him, and he may entertain any sort of idea, however wild and impractical, as to the origin and spread of disease.

The only requirement is that he show to the State that he has a trained mind, as evidenced by a high school or college education, and that he is familiar with the known facts of science about which there is no controversy and can be no controversy. These facts are not sectarian and are not the property of any one group; they are as unsectarian as are the facts of geography and mathematics.

These have frequently been given to the world by laymen, and not always by physicians.

The facts concerning the structure of the human body and its functions in health and in disease, as taught by anatomy, pathology, physiology, chemistry, and the rest, are not the property of the medical profession; they belong to all the world.

They were discovered and have always been taught by laymen as well as by physicians.

Surely, there can be no controversy as to the facts concerning sanitation, or as to the penalties imposed by violation of the natural laws governing the lives of living things as taught in biology.

The State Medical Association does not favor state medicine, and has never endorsed any law that would tend to restrict the art of healing to any class.

It is a duty and a function of the State to provide for the protection and health of the people, and all laws created for the purpose of securing pure food supply, good sanitary conditions, **the prevention and spread of epidemics, and to limit the occurrence of preventable diseases, are the concern of all the people.**

A careful reading of the Medical Practice Act will certainly quiet all of his fears on this point.

Under that law no man can be interfered with or limited in any way in the treatment of the sick by any means he may elect, whether it be by prayer, pills, or the laying on of hands, and **every citizen of Texas has a perfect right to employ the practitioner of his choice." - Dr W. B. Russ, MD, FACS, in "Texas State Journal of Medicine",** January 1925.

Medical Trade Examinations Tend To Fasten Disease On Children

"We are doing rather too much in protecting the physical health of children.

Many of them are being so imbued with the fear of disease that the number of hypochondriacs will assuredly be increased, and hypochondriasis is a form of mental disease." - Dr Charles W. Burr, Professor of Mental Diseases in the University of Pennsylvania, The New York Times, 13 April 1913.

"The American Medical Association hereby declares its opposition to all forms of "state medicine", because of the ultimate harm that would come thereby to the public weal through such form of medical practice.

"State medicine" is hereby defined for the purpose of this resolution to be any form of medical treatment, provided, conducted, controlled or subsidized by the federal or any state government, or municipality, except in such service as is provided by the Army, Navy or Public Health Service, and that which is necessary for the control of communicable diseases, the treatment of mental disease, the treatment of the indigent sick, and such other services as may be approved by and administered under the direction of or by a local county medical society, and are not disapproved by the state medical society of which it is a component part." - in "The House of Delegates Adopted Resolution", USA, May 1921.

"The situation may almost be stigmatized as communistic medicine in its most militant form, endeavoring to edge its way into American life under the cloak of patriotism." - in "Report of the Board of Trustees to the House of Delegates contained the following comment on the conditions created by the Veterans' Act of 1924", May 1925.

"The Board of Trustees voiced concern over the fact that 49% of the admissions to hospitals under the control of the Veterans' Bureau (in the fiscal year of 1927) were for the treatment of diseases and injuries not of service origin.

The House of Delegates approved a resulting recommendation of the Board of Trustees **"that every effort be applied to prevent extension of socialized medical practice by the government."** - June 1928.

The Daily Use of Medical Trade So-Called Medication Destroying The Body System & Organs By Pharmaceuticals In the Vain Hope That By Poisoning The Body One Will Achieve Health

"Use of Narcotic pain Medications such as Codeine, Morphine and Analogs, affect directly the Central Nervous System (limbic system). This affects the function of the Gastrointestinal Tract causing Severe Constipation and Nausea and Vomiting." - Culinard in "Taste and Smell in Cancer", 2004.

Medicine The Useless & Fraudulent Science

"The US National Institutes of Health (NIH), is the largest Medical Research facility in the world.

It has 18,000 employees and runs on an annual budget of $45 Billion.

I once suggested to Jim Warner, a White House policy analyst under Ronald Reagan, that somebody should do an audit of NIH and determine exactly what Medical advancements the Agency had actually made during its long history.

He thought that was a terrific idea.

But nothing came of it.

I assure you, an audit would reveal much less than meets the eye.

Much less in the way of useful discoveries and technology.

Along with **mountains of useless and fraudulent science.**

But NIH stands as a center of knowledge and a symbol, a reference point, a proof positive that Medical Science is marching forward.

It's a very expensive public relations tool.

Ditto for the CDC and the FDA. Both infernally corrupt agencies.

These days, debilitating, brain damaging, and life-destroying Vaccines are the Scientific revelations of Federal Medicine stands for.

Concocted Science." - Jon Rappoport in "Science as control; centers of fake knowledge are modern cathedrals; the Big Con", 10 August 2023.

"Besides, they say you can't become a real doctor without killing a few patients at the least."
"You know, you can't possibly learn medicine without killing a few patients.
Why, ***I myself have killed patients.***
Yes, every time I killed a patient, I learned a little something from it."
It was hard to believe that he was actually saying that, and I drifted off, imagining the Fish saying,
"Killing patients is a special interest of mine.
I have recently had the opportunity to review the world literature on killing patients.
Why, it would make a very interesting research project."
"Right. They have diseases, and we treat them: aggressively, objectively, completely, and we never give up."
"Well, that's just it.
I have been taught that the treatment for them is to do nothing. The more you do, the worse they get."
"What? Who taught you that?"
"The Fat Man."
"I don't understand.
The Fat Man taught you that ***to deliver no medical care is the most important thing you can do?"***
"Why do doctors want 'to produce complications?"
"To make money". *- Dr Samuel Shem, MD in "The house of God", 1978.*

Smell & Taste Cannot Be Separated

"Smell and Taste form a Single Sense, of which the mouth is the laboratory and the nose is the chimney; or, to speak more exactly, of which one serves for the tasting of actual bodies and the other for the savoring of their gases" - Brillat-Savarin, in "The Physiology of Taste", 1825.

A Word On The So-Called Epidemiologists

"The graduates of our best medical schools today are not fitted to do public health work.

During the last 2 or 3 years the National Board of Medical Examiners, examining graduates from Class A schools only, and the very best graduates of those schools, has scarcely found men who could get a passing mark, in preventive medicine, although there have been excellent marks in surgery, medicine and the specialties.

It is a matter for consideration whether the medical profession should fit men for preventive medicine or turn the job over to somebody else. The Sanitary Engineer as an all around man is better fitted as an Epidemiologist than the average physician. A number of medical schools are now offering courses in Public Health. They have a very precarious existence. The best Public Health courses are given at Harvard and at the Johns Hopkins schools, and in neither of these places is the attendance large enough to justify the existence of the school. The regulations of most of the states and many municipalities have been changed so that a medical degree is not required for health officers.

Some of the best municipal health commissioners today are not physicians. In our opinion the tendency in all medical schools is to teach curative medicine, not prevention. The committee recommends that we insist that medical men who are fitting themselves for health officers should take an additional course of not less than 2 years.

Even to make proper medical men we need more hygiene and preventive medicine in the medical course than we have. We recommend that 5 hours a week for one year be devoted to preventive medicine - double the amount of time we are now giving to this branch- and we do not expect to make expert epidemiologists in this way, but possibly we can give what the ordinary practitioners need." - Dr Victor C. Vaughan, MD in "Report of Committee on Public Health and Preventive Medicine", JAMA, 3 April 1920.

Pharmaceutical Companies Are Among Lawmakers' Favourite Stocks

"Pharmaceutical Companies are among Lawmakers' favourite stocks.

As of the most recent financial disclosures, over 50 lawmakers reported investing upwards of 6 figures in the Pharmaceutical and Health Products Industry." - in "Congress invests big in pharmaceutical, tech stocks", Open Secrets, 27 April 2020.

75 Senators & Representatives Traded Stock of Pharmaceutical Companies That Make COVID-19 Vaccines

"Dozens of Lawmakers on Capitol Hill have invested in companies that have a direct stake in the nation's response to the COVID-19 Pandemic.

In 2020 at least 13 Senators and 35 US Representatives held shares of Johnson & Johnson.

At least 11 Senators and 34 Representatives also held shares in 2020 of COVID-19 Vaccine manufacturer, Pfizer.

2 Representatives or their spouses held shares of Moderna during the same year that the world went on lockdown in response to the Pandemic.

Policymakers especially viewed the Coronavirus Vaccines developed by Pfizer, Johnson & Johnson, and Moderna — which each spent substantial amounts of Money Lobbying the Federal Government in 2020." - in "As the Pandemic raged, at least 75 Lawmakers bought and sold stock in Companies that make COVID-19 Vaccines, Treatments and Tests", Insider, 13 December 2021.

The Revolving Door

"In 2010, there was a simultaneous raid on 2 different locations in California.

Heavily armed agents stormed into private properties arresting several US citizens for dealing in a restricted substance.

Now drug raids happen quite frequently in the US, it's just one of the ways the authorities keep us free from malicious and harmful substances.

Only this wasn't a drug raid.

The substance being sold wasn't crack or crystal meth, or even bootleg. It was milk.

The reason why pasteurized milk doesn't come under this scrutiny, and the reason why raw milk, as opposed to cheese, eggs, raw oysters, sushi, why they don't come under the same FDA scrutiny, is that the major milk manufacturers, are a principle lobby within the FDA.

They have very small profit margins per unit, and so if in Whole Foods and other places there are significant numbers of consumers who come in to buy raw milk products.

It is a significant economic effect on the large milk processors.

The California milk raids were not an isolated event.

Over the past few years, there have been raids all across the US to crack down on the sale of many organic products, but despite any claims of safety concerns or risk, one thing is clear, the actions of the Regulatory Agencies, and by extension, the politicians that manage them, are not motivated by any notion of public good.

They're motivated by the desire to stay in power, that takes money.

The problem with the US political system is that it revolves around money.

And so, immediately, that sets off this dichotomy of those who can afford to play in the system and those who can't. To run for office, you need 1 and a half million dollars, you need about 11 million dollars to run for the Senate.

So if you don't have money, where do you go?

You go to the people who have a hand stretched out with money, ready to fund your campaign, but they're gonna want something in return, because, of course, they're not giving this money for charitable reasons.

Political influence has become just another arsenal in the marketing tool box of large companies.

Only instead of promoting themselves, they use this influence to suppress the competition, and the key to it all are lobbyists.

People think that we live in a free market society, and we don't.

Big government and big business are way too closely aligned today, and this, you know, is because of lobbying basically.

We have Cronyism, we don't have Capitalism in the United States, especially when it comes to the Military, and then Big Medicine, Big Food, like Monsanto, with all the GMOs and stuff.

Most people don't want it, but yet it's being forced on us because Monsanto has such leverage in Congress through all the lobbying of the food industry.

So, what is lobbying?

Well, simply, lobbying is the act of influencing decisions made by legislators, and Regulatory Agencies, you know, the guys who make the rules, and the people who exert this influence are called Lobbyists.

Well connected professionals with slick suits and slicker tongues.

Lobbyists tend to be experts in the fields they lobby for, they advise law makers on how to make sure Americans are getting the most benefit from the laws they pass, while also reducing potential harm.

It's a good idea, why wouldn't you want an expert's advice?

Here's where things get screwy.

Sometimes the law makers decide the cash is greener on the other side, so they become lobbyists themselves.

They leave government and join a private company, taking their connections and influence with them.

This phenomenon is called the revolving door, people going from regulating an industry to working in that same industry, and sometimes back and forth multiple times.

Corporations love having such powerful people on their payroll, so they do everything they can to lure them over, and for their part, the regulators help out by making a few choice laws to benefit their future employers.

And with the spin of the door comes a host of new laws that benefit some companies, hinder others, but business keeps rolling and in the end, no one really gets hurt, except, of course, the people.

You'll see members of Congress who will take on issues defending one particular special interest, and then go out to work for that special interest after they leave, and the same is true of all Government Agencies.

In fact, that's considered the normal way to do business in Washington.

Big government and big business essentially are the same, are they not?

What's the difference between a corporation and a government agency, when the corporation buys the politicians with campaign donations and the politicians do as they're told in passing laws that the corporation would have passed had the corporation been the government.

Sadly, this phenomenon is all too common today and it's not specific to just one industry, rather, it seems that many of the agencies which have the power to influence our daily lives are corrupted by the revolving door.

When you have delegated power to Committees and Government Officials and Agencies to regulate the economy, it always leads to corruption.

It's too tempting for people not to use that power for their own personal agendas, and the revolving door is merely proof of the fact that when you give government and it's agencies the power to regulate commerce, it always, always, will lead to corruption.

Nine tenths of all Federal law is not the product of those we elect, but rather the product of the unelected heads of these Bureaucratic Agencies.

So we do not have a limited Federal Republic in the United States, what we have instead is an unlimited Bureaucratic Oligarchy in which these Bureaucratic Agencies operate largely without any accountability.

This isn't a representative form of government, they only represent the most powerful and the people that give them the most amount of money.

The corporations, the multi nationals have taken over, whether it's agriculture, whether it's broadcasting, whether it's Pharmaceutical, whether it's retail, you name the field, a few control it all.

With so much collusion between Regulators and the Industries they regulate, the laws governing our daily lives are becoming excessive, unnecessary, and often, downright nonsensical." - in "Freedom from Choice", 2014.

UK Government Business Plan

"Vaccine technology and innovation.

UKHSA will proactively anticipate and encourage advancements and innovation in Vaccine Technology.

Explore opportunities related to research and development, Manufacturing, supply chains, and delivery methods.

Close collaboration with Vaccine Developers and clinical experts is essential in this process and will include horizon-scanning and assessment of Emerging Health Threats that could potentially be addressed through Vaccination.

Continue to develop pathogen Genomics and Surveillance Capabilities by investing in efficient and long-lasting data and technology infrastructure, building on the world-leading expertise established during the COVID-19 Pandemic while maintaining the ability to ramp up in response to an incident. Build capability to deliver a 'Genomics-First' approach for Epidemic and Pandemic Preparedness to enable the rapid detection of Potential Emerging Infections and outbreaks.

Vaccinations, Immunisations & Treatments

UKHSA will:

1. Manage procurement, storage, and distribution for national immunisation programmes given to over 5 Million Children and adults each year, as well as Vaccinations for childhood influenza, COVID-19 and emergency clinical countermeasures

2. Systematically assess and drive forward the epidemiological and scientific evidence base for new opportunities for existing or Novel Vaccine Development Programmes, including the potential use of New Vaccine Platforms, working closely with the department and across Whitehall.

3. Establish a Vaccine Development and Evaluation Centre to strengthen preparedness for priority infectious diseases threats through laboratory-based studies to support the development and evaluation of Vaccines and Therapeutics.

4. Support DHSC and NHSE to reduce the impact of Vaccine preventable diseases including polio and measles, in line with elimination and eradication strategies in particular where coverage has significantly diminished or elimination status has been lost.

5. Continue to provide secretariat and modelling support to the Joint Committee on Vaccination and Immunisation.

Working With Academia & Industry

By implementing its science strategy, UKHSA will:

As part of this strategy, UKHSA will continue to work with academia to support innovative science to better understand hazards to public health and develop practical ways to prevent and control them; and **work with Industry, in particular in the Life Sciences, to prevent and mitigate public health hazards through innovative approaches and collaboration such as with Pharmaceutical Companies on Vaccine Research and Development of Diagnostics." -** in "Letter from Maria Caulfield MP to Professor Dame Jenny Harries, UKHSA chief executive", Department of Health and Social Care, GOV.UK, 16 August 2023.

On The Road To 100 Day Vaccines

"International **Policymakers, Scientists, and representatives of Industry, Philanthropy and civil society were united at the Global Pandemic Preparedness Summit — co-hosted in London by the Coalition for Epidemic Preparedness Innovations (CEPI) and the UK Government on March 7-8, 2022 — in endorsing the ambition to have safe, effective, and globally accessible Vaccines against the Next Pandemic threat ready in just 100 days."** - in "The Global Pandemic Preparedness Summit: On the road to 100-Day Vaccines", CEPI, 29 March 2022.

The Masks Farce

"The most rigorous and comprehensive analysis of scientific studies conducted on the efficacy of masks for reducing the spread of respiratory illnesses — including Covid-19 — was published late last month.

Its conclusions, said Tom Jefferson, the Oxford epidemiologist.

"There is just no evidence that they" — masks — "make any difference.

Full stop.

There's no evidence that many of these things make any difference."

What about the studies that initially persuaded policymakers to impose mask mandates?

"They were convinced by non-randomized studies, flawed observational studies." - in "The Mask Mandates Did Nothing. Will Any Lessons Be Learned?", New York Times, 21 February 2023.

Epidemiologist Jonathan Van-Tam Deputy Chief Medical Officer for England: 2017-2022

"Jonathan Van-Tam graduated in Medicine from the University of Nottingham in 1987.

After 5 years of hospital-based clinical medicine, he pursued an academic training in **Public Health and Epidemiology and developed an interest in Influenza and Respiratory Viruses.**

He became a Senior Lecturer at the University of Nottingham (and Consultant Regional **Epidemiologist, Public Health** Laboratory Service) **in 1997, before joining the Pharmaceutical Industry as an Associate Director at SmithKline Beecham in 2000.**

In April 2001 he moved to Roche as Head of Medical Affairs, before joining Aventis Pasteur MSD in February 2002 as UK Medical Director.

He returned to the **public sector in 2004 at the Health Protection Agency Centre for Infections, where he was Head of the Pandemic Influenza Office until October 2007.**

Jonathan returned to Nottingham as Professor of Health Protection in 2007, maintaining his now 30-year **special interest in Influenza: Epidemiology; transmission; Vaccinology; Antiviral Drugs; and Pandemic Preparedness.**

He chaired the European Centre for Disease Prevention and Control (ECDC) Expert Advisory Group on H5N1 human Vaccines, sat on the UK national Scientific Pandemic Influenza Committee (SPI), and the UK Scientific Advisory Group for Emergencies (SAGE), during the 2009-10 Pandemic.

He is Co-Editor of "Introduction to Pandemic Influenza" in 2009.

Editor-in Chief of Influenza and Other Respiratory Viruses from 2014-2017.

His unit was an officially designated WHO Collaborating Centre for Pandemic Influenza and research and a UK Faculty of Public Health 'National Treasure' research training location from 2010-2017.

Jonathan was seconded to the Department of Health and Social Care, England as Deputy Chief Medical Officer from late 2017 to early 2022." - Jonathan Van-Tam, in "LinkedIn", 20 August 2023.

"Moderna is delighted to announce that Professor Sir Jonathan Van-Tam has been appointed as a part-time consulting Clinical Advisor.

The appointment is in accordance with the Department for Health and Social Care (DHSC) in England's Business Appointment Rules policy.

Professor Van Tam has had a distinguished **career in Public Health and Epidemiology, working in government, academia and Industry.**

In 2017 he was seconded to DHSC as Deputy Chief Medical Officer, where **he was a key provider of independent advice to the Government on Covid-19, leading on health protection and regularly presenting at Downing Street press conferences."** - Moderna in "LinkedIn", 30 August 2023.

"Sir Jonathan Van-Tam, the **UK's former deputy chief medical officer who became a household name during the pandemic, has become a senior medical consultant to the Covid-19 Vaccine maker Moderna.**

The UK Government bought Tens of Millions of Covid jabs from Moderna during the Pandemic, and struck a 10-year partnership with the US drugmaker to boost research and development of mRNA Vaccines in the UK, including constructing a new Vaccine Factory.

Van-Tam has also been a consultant to the World Health Organization (WHO) on Influenza since 2004.

He worked in the pharmaceutical and Vaccines Industries from 2000 until 2004, for SmithKline Beecham (GSK), Roche and a joint venture between Sanofi-Pasteur and MSD.

He became a **consultant Epidemiologist and head of the Pandemic Influenza Office at the UK Health Protection Agency in 2004 and sat on the UK Scientific Advisory Group for Emergencies (Sage) during the 2009-10 swine flu pandemic."** - in **"Former Covid Medical Officer Van-Tam takes role at Vaccine Maker Moderna"**, The Guardian, 18 August 2023.

Hearth Attack on the Rise After UK Government Starts Advertising Campaign on Television - 2023

Never has there been a TV Advert Campaign Concerning Heart Attacks, but after the forced coercion upon the Population to take the Covid-19 Vaccine, people are dying in their hundreds daily from Heart Attacks:

> ***"Heart Deaths surge by more than 500 a week since Pandemic. Experts say Britain is 'in the grip of a heart and stroke care emergency' due to NHS disruptions in care and increasing ambulance delays."*** *- in "Telegraph", 22 June 2023.*

> ***"Little-known Heart Attack symptoms as NHS shares warning signs you should never ignore.***
> ***There are certain lesser known heart attack warning signs the NHS are hoping to raise awareness of with a new campaign to save lives."*** *- in "Daily Record", 18 August 2023.*

The Administration Of Drugs Be Unnecessary Or Hurtful

"In reflecting upon the use, disuse, and abuse of remedies by our profession, I am tempted to regard the general neglect or abandonment of counter-irritation as presenting the most remarkable change in modem practice.

Part of the blame of over-medication rests , as I have said, with the profession, in yielding to the tendency to self-delusion, which seems almost inseparable from the practice ; in our mode of inference , too often adopted, of counting only our favorable cases, and in falling into the not uncommon error known in scholastic phrase as "post hoc ergo propter hoc":

The patient got well after taking my medicines, therefore he got well because of takingthem.

The greater portion of this blame, however, rests properly with the public, which insists on its right to be poisoned by somebody; it is obvious who buys the quack medicines which have built palaces for.

Like Barnum of illustrious memory, they believe in and practice on the measureless gullability of a public which actually enjoys being humbugged.

The whole dishonest and shameless business is built, as on a rock, upon the popular delusion that sick people must feed upon noxious substances, the more the better, the nastier the more effective .

The outside pressure upon the physician is very great, tending to force him to active treatment, whether in his judgment necessary or not. Some error of diet , some improper habit of the patient, may only need correction, and the administration of drugs be unnecessary or hurtful." - Dr H. Brown, MD in "Transactions of the Kentucky State Medical Society", 1892.

Preamble

Were should we start?

What can we say?

The "document mill" put out by the Unelected Chinese Communist Party is: Incoherent, Contradictory at times, and all in all, a Semi-Half-Baked Jiaozi.

But, overall it's just remarkable, incredible indeed, that in a Mega City where **hundreds of thousands of its citizens suffer from Pneumonia ever year**, why would a single person with "fever and cough", be suddenly identified as having a "New Virus", caused by a "New Pathogen"?

> *"Hospital-acquired Pneumonia (HAP) and ventilator-associated pneumonia (VAP)* ***are the most common hospital-acquired infections in China.***
> ***The difficulty in diagnosis and treatment of HAP/VAP leads to high mortality.***
> ***In China, it has been nearly 2 decades since the initial "Guideline for the Diagnosis and Treatment of Hospital-acquired Pneumonia*** *(draft)" was published in 1999.*
> ***HAP/VAP belongs to hospital-acquired infection.***
> *Large scale cross section survey of nosocomial infections in China showed that the incidence of hospital-acquired infection ranged from 3.22% to 5.22% in hospitalized patients, and the incidence of hospital-acquired lower respiratory tract infection was 1.76% to 1.94%.*
> ***The researches in China, and other countries have demonstrated that lower respiratory tract infection, including HAP/VAP, accounts for the largest proportion of hospital-acquired infections."*** *in "Chinese guidelines for the diagnosis and treatment of hospital-acquired pneumonia and ventilator-associated pneumonia in adults", J. Thorac. Dis., June 2019.*

So the questions are:

1. Why would someone, in 1 of the many (28) Hospitals in Wuhan would stop, and call the CDC-China, to come and see 1 person with Fever and Cough?
2. Why would someone call the World Health Organization because of someone has a fever?
3. Why would the Minions of the CDC-China, call the WHO, before "Identifying" the cause?
4. Why do a PCR Test, one week after the CDC-China called the WHO in the first place?
5. Why there are discrepancies on the first test done?
6. Why are the Academics in Australia involved in these so-called Tests?

Is there any experiment showing proof of a "virus" jumping from an animal to a human, or vice versa, or from Human-to-human transmission? Nope!

Is there any proof that "Viruses" Exist? Nope!

Is "Virology" living in La-La-Land? Yep!

The more documentation we read the more questions are raised. The Chinese Communist Party should have sent the Memo, to all involved parties, and should have better coordinated a more credible story.

Then we have the chap, a supposed "covered body" on the pavement, of a street in China, from a mega city, thus, why was there, on the spot, among the millions of its citizens, a photographer, on that exact spot?

Another item which was not credible, was the fact that on Chinese social media an alleged "doctor", was so in good health, that he was on the Intensive Care Unit, but was strong enough to make videos and post them online.

And, social media in China is heavily censured, but wait, not this one, this alleged "doctor", for he made not one but several videos.

He also didn't get the memo, that the majority of people with Pneumonia in the hospitals where without danger.

Then we have the little problem with the existence of actual "viruses". So the entire mater, to say the least, is Farcical from the start.

Medical Trade Farcical Theory of Viruses

The following is just in reference to bacteria which are the physically possible smallest organisms that exist in a 3 dimension world, in other the absolute smallest organism capable of existence is a unicellular organisms such has bacteria.

If bacteria which is greater than the fictitious Medical Trade delusional theory of "viruses", just imagine the impossibility to identify or isolate a "virus".

To attribute a quality to something that doesn't exist is pure madness.

Sampling Problems

"Good samples of saliva and of faeces can be obtained in a form suitable for quantitative bacteriology, with results expressed as number of organisms per gram; faeces can be assumed to be representative of the rectum and rectosigmoid region.

Other sites are less readily sampled.

Within the mouth there are distinct floras (in addition to saliva), on the tongue, tooth surface, gingival crevices, roof of mouth and cheek surface.

In order to sample these quantitatively it is necessary to swab standard surface areas and then express the results as number of organisms per cm2.

This is rarely practicable so that, in practice, non-standard areas are swabbed and the results expressed as relative counts or proportions of the total count — a semi-quantitative technique.

Between the throat and rectum it is necessary to use other methods of sampling because of the inaccessibility of these sites, and no sampling method is satisfactory.

Samples of luminal contents can be obtained at surgery from specific sites in the gut.

However, surgery almost always involves pre-operative preparation to empty the bowel.

Further, under anaesthesia there may be profound changes in bowel motility.

This, of course, will compromise the validity of the specimen. Samples may also be obtained by intubation (upper gut) or endoscopically.

Both intubation and upper gastrointestinal tract endoscopy can be criticized for contamination of the sample with saliva and contamination of the tip of the tube during its descent to the sampling site.

Various methods have been devised to overcome tip contamination.

Samples of colonic contents can be obtained without bowel preparation using a rigid proctoscope (which permits sampling of the rectum and part of the rectosigmoid) or flexible sigmoidoscope (which samples up to the rectosigmoid; sampling from higher in the colon using colonoscopy requires bowel cleansing and so invalidates any luminal samples obtained).

Mucosal biopsy samples can be obtained at endoscopy for study of the mucosa associated flora.

Analyses of these are usually expressed as counts per gram of biopsy; however, only the mucosal surface is colonized and estimates of the mucosal surface area in a biopsy are largely notional.

In the future it is likely that results will be expressed using the amount of mucin as a measure of mucosal surface area.

Ideally the samples should be analyzed bacteriologically as soon as they are taken but this is rarely possible.

The bacteriology laboratory is usually distant from the endoscopy unit, for example, and so the sample needs to be protected during transit.

For transport within the hospital it is usually sufficient to transfer the sample to an anaerobic tube and to keep it cool (but not frozen).

In most laboratories, samples are analyzed in batches and this entails samples being stored.

Crowther (1971) studied storage of faeces and showed that the best results were obtained by freezing at 40°C in a cryoprotective medium containing 10% glycerol.

This cryoprotective medium is also ideal for storage of salivary samples; gastric juice can also be stored in this way if it is first neutralized.

Duodenal juice is rich in bactericidal bile components which are active even at 40°C and in the presence of glycerol**; no good storage medium has been devised for such samples and this may explain why so many studies show duodenal contents to be sterile.**

Cultivation Problems

Despite the impressive progress made in cultivation methodology during the last 30 years there is still considerable scope for further improvement. Helicobacter pylori, now the most intensively studied gut organism and thought to be responsible for an array of peptic diseases, was not isolated until 1984 by Marshall and Warren, and it is unlikely that this is the last surprise that gut bacteriology has for us. The problems can be divided into those related to the cultivation medium and those related to the cultivation environment.

New media are constantly being devised for cultivation of organisms of medical importance but **little has been done with respect to the cultivation of organisms with specific biochemical activities.**

The vast majority of bacteria in most digestive tract sites are strictly anaerobic and are killed by oxygen; in order to isolate quantitatively such organisms it is necessary to plate out samples in an anaerobic environment, using plates that had previously been deoxygenated and then to incubate the plates in a suitable anaerobic environment of hydrogen, nitrogen and carbon dioxide.

The problems of sampling and cultivation were discussed in detail by Borriello et al. (1978) and, more recently, by Borriello (1986)." - in "Role of Gut Bacteria in Human Toxicology and Pharmacology", 1995.

"Disease is an ally of ignorance, dirt and disorder, and it everywhere tends to disappear on the improvement of knowledge and of social conditions.

Standards of personal, domestic and municipal living are ever advancing and sweeping away the opportunities that formerly existed for the spread of infection.

Sanitary works possess a number of advantages as compared with other measures for the prevention of disease.

First, they have a wholesale application.

A water supply that is made pure is wholesome for every person who as occasion to drink it.

Although there is a considerable investment of capital in these enterprises, the maintenance cha are not excessive and the results are satisfactory.

Yielding to works of sanitation are not only typhoid dysentery and other diarrheal diseases, but some other forms of sickness that cannot conceivably be conveyed by drinking water.

Simple cleanliness is one of the most healthful as well as one of the most educative measures known." - George A. Soper, Major, Sanitary Corps, U.S. Army, in "Congressional Digest", August-September 1935.

"A healthy mental attitude is the greatest of all helps in preserving physical sanity; break down a healthy mental attitude, and the baleful germs that are in all of us will riot uncontrolled.

Virtually all of us go through life with engines that are more or less imperfect, but that do their work satisfactorily enough as long as we do not watch them, tinker over them and fuss with them.

A compulsory, universal medical examination would probably result in widespread depression and despair."

- The Youth's Companion

"There are many indications that we are drifting toward the pernicious notion that the citizen is the ward of the state. The parents naturally would like to know, when they send their child off to school in the morning, how much of him they may fairly anticipate will return at night, and by what authority the missing ports have been subtracted. Should we undertake to compel the child to submit to an examination or treatment for non-contagious infirmities or defects which concern his own health only and involve no danger to the health of others. The school authorities have not yet been invited by the Legislature into this new field, and any enactment so doing would, on constitutional grounds, be more than questionable. The courts would, I believe, be slow to tolerate such an unwarranted usurpation of the rights of the individual and invasion of the sacred precincts of the family." - William Nottingham,, MA, "Regent University, State of New York, in "The Journal of the American Osteopathic Association", April 1912.

"There are **80 Autoimmune Diseases, each one without a known cause. Scientists have no idea what causes the heart attacks and cancers that kill one million people annually. In medicine, the word "germ" is often used synonymously with the word "bacteria." This, in a small way, illustrates the confusion regarding the causes of disease among even the brightest medical practitioners and scientists.**

This work includes scientific notation and confirmation of the hypothesis that disease does have a known pathogen and is not bacterial in every instance! The invention of antibiotics was viewed as revolutionary by those in 1950's science. Scientists concluded that we had finally defeated the germs responsible for causing sickness and disease. If this were true, 1955 should have been a banner year in science. Bacteria continue to elude even the best antibiotics, despite the billions of dollars of pharmaceutical research. Unless the etiology (cause) of a disease is identified, all the supplements and drugs in the world may be for naught." - Dr Doug A. Kaufmann, MD in "The Fungus Link", 2000.

The Germ Theory of Disease

This whole controversy between the germ-fobiac and the bio-chemist is leading toward one great goal-that health officers should not be "men learned in medicine and surgery" but should be civil engineers or even plumbers with ordinary horse sense.

Sanitation and right living prevent diseases more than anything else, and the sooner the physicians wake up to this, the sooner they will be in line with the education that is now going on in opposition to the medical lobbyists.

This education the public is absorbing and it is only a question of time when they will throw the medical lobbyists out and will enact laws along the lines of common sense and natural methods.

When the germ theorist asserts that pneumonia, tuberculosis, diphtheria, typhoid fever and meningitis are caused by germs, and the bio-chemic theorist declares that germs have nothing to do with the causation of the above named diseases, then it is time for citizens to examine the foundation of each theory, and support the one which appeals more strongly to their hard, common sense.

The study and classification of germs belong to the science of bacteriology, and as this science was placed on a practical basis only about the year 1880, it is in age only an infant with an infant's vagaries and illusions.

Analytical chemistry is a more exact science than bacteriology; its history extends over centuries.

*"**A Virus is not a living organism** and can only grow and reproduce in the cells of a host." - in "Dictionary", Merriam-Webster, 2023.*

"10 Skin Cells could line up along the side of a grain of salt. 100 Bacteria would fit along that same salt grain.
***It would take 1,000 Viruses to fill that same space!"** - in "A Planet of Viruses", 2020.*

Medical Trade Propaganda Starts At Early Age

***"The Vaccine Makers Project (VMP) is committed to public education about Vaccine science** via scientifically supported, historically accurate and emotionally compelling content.*
***Originally produced by Medical History Pictures and sponsored by the Vaccine Education Center at the Children's Hospital of Philadelphia,** VMP **has evolved to become the classroom-based program** of the Vaccine Education Center at the Children's Hospital of Philadelphia." - in "Children's Hospital of Philadelphia", 2023.*

The Physiological Trickery Used To Convince People That Viruses Exist

In the Snake-Oil-Medical Trade Theory of Virology, computer graphics are compulsory.

The following is a Computer Graphic which is based upon fantasy. Even in the impossible event that "viruses" existed, the following is just the type of nonsensical, farcical stupidity that comes from the Medical Trade so-called Virologists.

The size of the alleged "viruses", makes it a physical impossibility, thus farcical to come up with such representation is which based on fantasy alone.

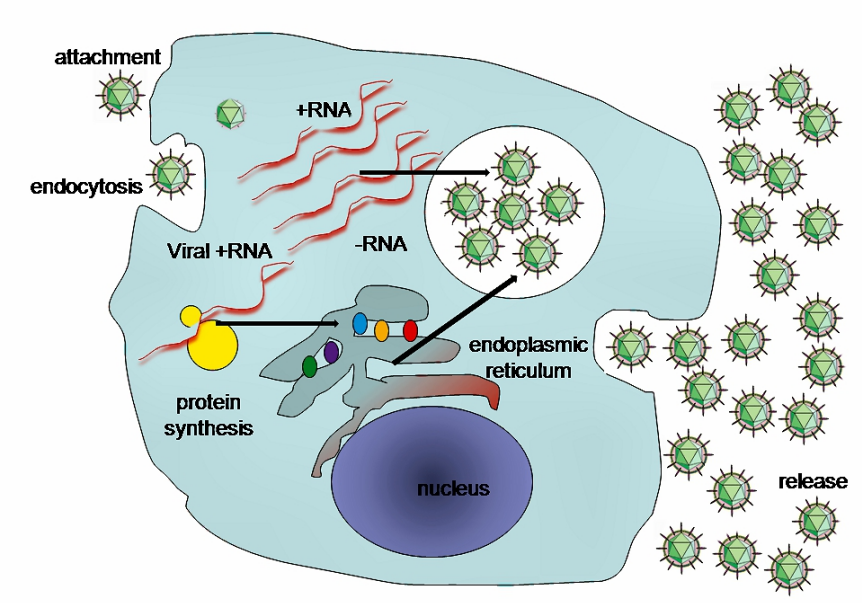

Image: "A typical virus replication cycle." - in "Wikipedia", 4 September 2023.

Foundation of the Germ Theory

"And the rain descended, and the floods came, and the winds blew, and beat upon the house that was founded on sand, and it fel, and great was the fall thereof.

The 2 main points upon which the Germ Theory is founded are:

1. The presence of different germs with different diseases;
2. That disease follows the hypodermic injection of germs beneath the skin of all animals.

(Some tests have been made on human beings, but, as the germs were not used scientifically, the result was not conclusive).

If you ask when the germs first appear, no answer is given.

If you ask the Germ Theorist to point out the relation between injecting germs in small animals and giving human beings the same germs in food or drink, they have to admit that these are 2 distinct procedures with practically no relationship.

If you examine the standard works on bacteriology you find no positive proofs given, that germs, if taken in food or drink, are harmful.

If you point out the cruelties inflicted upon dum animals during their experiments, the reply is that the end justifies the means.

The assumption that because germs are found with disease they are the cause of it, and that if injected germs will cause disease, inhaled or ingested germs will do the same, is surely a "foundation of sand."

Foundation of the Bio-Chemic Theory

And the rain descended, and the floods came, and the winds blew and beat upon that house, but it fel not, for it was founded upon a rock.

The first point for the Bio-Chemic Theorists to decide was whether the germs appeared before or after the onset of the disease.

This was a rather difficult task, as our professional bacteriologists are not called until after the attending physician sees the case, and the latter is not called until after the disease shows itself, when it is usually too late to make a fair test; but a long, careful study of early cases, especially in pneumonia, typhoid, and diphtheria, where the appearance of the germs is so often delayed, showed that the germ followed the onset of disease, and consequently could not be the cause of it.

My own observations covered a period of over 3 years.

Many other careful observers have investigated this point, and today there is a mass of evidence that cannot be broken down that the germs are the product and not the cause of disease.

As the Germ Theorists strongly opposed this pivotal point - claiming that the germs were present but undiscovered - their argument was met by destroying all uncertainty and dealing with solid facts that they could not deny.

Bearing in mind that germs are the product of disease, and thus harmless, the Bio-Chemic Theorists of Toronto carried out the following experiments:

Typhoid Germs

In testing typhoid germs 45 Experiments were made in which water, milk, bred, cheese, meat, fish, potatoes, hedcheese, butter, porridge, etc., were infected with millions of fresh, vigorous Typhoid Germs; this food containing the germs was used in the ordinary way; and, as the Bio-Chemics expected, **there was not a single instance of any sign of typhoid.**

Here we have **45 facts - not assumptions** - to build on.

Pneumonia Germs

In this series of **19 Experiments, milk, water and food were infected with millions of Pneumonia Germs,** and altho **no precautions were taken to prevent the disease, no sign of the disease developed.**

Diphtheria Germs

A total of 40 Experiments were made with germs of diphtheria, in which they were not only taken in water, milk, bred, porridge, potatoes, cheese, butter, etc., but other millions of germs were swabbed in the nose and throat, and every facility given them to develop, **but in spite of all efforts they refused to develop**, altho they would grow rapidly on nutrient agar.

These tests were made scientifically and part of the germs were grown from stock tubes furnished by one of the best known laboratories in North America.

These are facts — not opinions.

Tuberculosis Germs

In this series of tests **19 Experiments** were made; special attention was paid to thoroughly infect milk, water, bred, meat, potatoes, etc., with millions of germs, fresh and vigorous, **but in spite of every effort to get them to develop, they were positively inert.**

The germs used were human (not bovin) tubercle-bacilli germs.

Meningitis Germs

As these are the dreaded germs supposed by some to cause infantile paralysis, and believed to germinate in the nasal mucous membrane, special pains were taken to infect nostrils and throat with fresh colonies of germs; they were swept over the turbinated bones, pushed into sinuses, swabbed over the floor of the nostrils, rubbed on the tonsils, placed beneath the tong, taken in milk, water and food; but

in spite of coaxing, coddling and urging, **they refused to produce a solitary sign of meningitis in the 11 tests made.**

10 Experiments were made with Germs, viz.:
Typhoid and Pneumonia,
Typhoid and Tuberculosis,
Diphtheria and Meningitis,
Typhoid and Meningitis,
Diphtheria and Pneumonia, etc.,
But all failed to produce any effect.

Germs Used in Experiments

For the benefit of bacteriologists we enumerate the germs used in the tests mentioned: Eberth bacilli, Klebs Loeffler bacilli, tubercle bacilli (human), diplococcus neumoniae, and diplococcus intracellularis meningitidis — all well known to bacteriologists.

Chemical Causes of Disease

The experience of ages has shown that many diseases have a chemical (not bacterial) origin; as examples, tainted meat or oysters contain a chemical poison that will cause typhoid; the inhalation of clorin or bromin gas will cause bronchitis and pneumonia — the latter may also be caused by the chemical effect of exposure to cold; sunstroke by the chemical effect of heat; led poisoning by working in led; stonecutters or miners thisis by the inhalation of coal or mineral particles; rus poisoning by coming in contact with poison ivy; cirrosis of the liver thru abuse of alcoholic liquors; colic from eating green apples or unsuitable food in fact it is the violation of chemical laws that causes most of our intestinal diseases.

Summary of Facts

1. That germs follow the onset of disease.
2. That many diseases have a chemical origin.
3. That germs may be inhaled or ingested without harm.
Truly a rock foundation.

Different View Points

From the Germ Theorist viewpoint it is permissible to dump barrels of an irritant poison (bleaching powder) into drinking water; from the Bio-Chemic Theorist viewpoint that act is maniacal.

From the Germ Theorist viewpoint it is reasonable to forbid milkmen to sell or deliver natural milk; from the Bio-Chemic Theorist viewpoint that act is criminal.

From the Germ Theorist viewpoint it is advisable to quarantine citizens if found carrying certain germs — thousands of citizens carry germs unknowingly; from the Bio-Chemic Theorist standpoint it is an unwarranted robbery of our citizens' liberty.

The Citizens Mistakes

Many citizens believe that clorination protects them from typhoid, but the facts that Toronto with clorinated water has an average death rate from typhoid twice that of London, England, with natural water, and that in 1916 we had 3 times more deaths from typhoid than in 1915 show their error.

Again, while clorination does not save us from typhoid, being an irritant to the mucous membrane, it favours nephritis and Bright's disease.

Toronto's record is suggestive: In 1912 Toronto lost 14 citizens from nephritis (inflammation of kidneys) and Bright's disease; during 1913-14 the deaths increased, and in 1915 Toronto lost 218 persons from these diseases — an increase of over 30%.

Many citizens believe that half-cooked, pasteurized milk is good, but the facts that Toronto's infantile death rate is 29%, higher than London, England, and twice as great as rural Ontario's (both prefer using natural milk); that the death rate in Toronto Sick Children's Hospital, in the Infants' Home on St. Mary street, and R. C. Infants' Home on Power street, increased when they stopped using natural milk, all show clearly that the insane desire to tamper with normal milk has cost Toronto many infantile lives.

Again, **when citizens of whatever country realize that they may be quarantined simply because they carry some harmless germs, it is time for them to organize and fight for their personal rights.**

It is a battle between principles; a fight between later scientific facts and past theories; a question that must be fought out.

The Bio-Chemic Theory **appeals to humane persons, for where thousands of small animals have suffered death thru Germ Theorists experiments,** the experiments here mentioned cost neither life nor health to man nor animal." - Dr John B. Fraser, MD, in "A Lecture Course to Physicians on Natural Methods in Diagnosis and Treatment", 1918.

Note:

"Dr Frazer, MD formally issued a challenge open to everyone — Health Boards or Physicians — to test the danger of germs publicly.

No conditions except that the experiments should be done openly, yet so far as I can learn, no one has had the courage to accept the challenge." - G.S.W.

Vaccination Gigantic Delusion

"I have here so presented the best of these statistical facts as to satisfy my readers of the certain and absolute uselessness of Vaccination as a preventive of small-pox; while these same facts render it in the highest degree probable that it has actually increased susceptibility to the disease.

The teaching of the whole of the evidence is in one direction.

Whether we examine the long-continued records of London mortality, or those of modern registration for England, Scotland, and Ireland; whether we consider the "control experiment" or crucial test afforded by unvaccinated Leicester, or the still more rigid test in the

other direction, of the absolutely Revaccinated Army and Navy, **the conclusion is in every case the same: that Vaccination is a gigantic delusion; that it has never saved a single life; but that it has been the cause of so much disease, so many deaths,** such a vast amount of utterly needless and altogether undeserved suffering, that it will be classed by the coming generation among the greatest errors of an ignorant and prejudiced age, and its penal enforcement the foulest blot on the generally beneficent course of legislation during our century.

To talk of amending such legislation is a mockery.

Absolute and immediate abolition is the only rational course open to us.

Every day the Vaccination laws remain in force parents are being punished, infants are being killed.

An Act of a single clause will repeal these vile laws; and I call upon every one of our legislators to consider their responsibilities as the guardians of the liberties of the English people, and to insist that this repeal be effected without a day's unnecessary delay. - Professor Alfred Russel Wallace, in "Vaccination a Delusion", 1898.

"In many cases physicians become interested in the strict enforcement of the law because of the fees resulting therefrom.
In the more populous districts the medical fees resulting from Vaccination are an important item.
This mercenary motive has been the controlling factor in a sufficient number of cases which have come to the attention of this Department to justify the above assertion." *- Andrew S. Draper, Commissioner of Education, New York State, in "Fifth Annual Report", 25 January 1909.*

Endless Scaring The People With A Supposed "Virus"

"People are Sick of Endless Covid Scaremongering.

The mask mandates forced upon citizens were ineffective at best.

We know the devastating impact lockdowns have had on the mental health of young people.

We have but one option.

Do not comply.

As soon as we give up our freedom for a bit of safety we risk losing all of it, alongside everything that gives us our humanity.

I urge everyone to take into account what we would be risking by sleepwalking again into disaster. Our jobs, our friendships, and even our futures may be at risk if we refuse to back down in the face of Biden's fearmongering.

We must be brave and stand up for our right to a Free Life." - in "Biden's plot to send America back into lockdown must be stopped", The Telegraph", 24 August 2023.

"You may know the virus does not exist.
And it can still come for you, because the virus is a thought-form; a dark spirit that has infiltrated humanity.
It may not exist as a "scientific thing" but it has all the life and existence we give it." *- Eric F. Coppolino, in "Youtube"*

"Once the Virus Myth and the role of the Fictional World of Virology in the war on humanity is understood the ramifications are vast. The anti-science on which the myth is based articulates and underwrites an elaborate System of Surveillance and Control." *- Dr John Bevan-Smith*

"Scientific matters can only be clarified by prolonged, faithful bona fide observations." *- Dr Wilhelm Reich, MD*

Chapter 1

The Months Before the Beginning of the So-Called "Covid-19 Pandemic"

21 January 2019

"Major Risk Prevention"

"In January 2019, China's supreme political leader **Xi Jinping convened a high-level Communist Party meeting focused on: "Major Risk Prevention".**

"Black Swans"

He told the Assembled Senior Officials to be on their guard for "Black Swans" - the unpredictable, unseen events that can plunge a system into crisis.

"Grey Rhinoceroses"

But he also warned them about what he called "Grey Rhinoceroses" - the known risks that are ignored until it's too late." - in "BBC, 15 December 2019.

22 January 2019

"Xi urges major risk prevention to ensure healthy economy, social stability.

Facing the complicated international landscape and confronting with the formidable tasks of reform and development and maintaining stability, **we need to keep high vigilance against unexpected "Black Swan" and "Gray Rhino" events to forestall and defuse major risks**, Chinese President Xi Jinping said on Monday.

President Xi, also general secretary of the Communist Party of China (CPC) Central Committee and chairman of

the Central Military Commission, made the remarks when addressing the opening ceremony of a study session at the Party School of the CPC Central Committee, with attendance of senior provincial and ministerial officials.

The president told senior officials to strengthen their ability in preventing and defusing major risks to ensure sustainable and healthy economic development and social stability.

In his speech, Xi analyzed and raised specific requirements on the prevention and defusion of major risks in areas including politics, ideology, economy, science and technology, society, the external environment and Party building.

The overall situation of China's economic development is good at present, but there are complex and profound changes the world is facing today, Xi said, adding that China should maintain its strategic focus to steer the domestic economy in the right direction, **protect against potential dangers and respond appropriately to major economic risks and challenges.**

Noting that science and technology security is an important component of the national security, Xi called for more efforts to improve the national innovation system, strengthen areas of weaknesses, intensify research in leading-edge technologies and accelerate development of major infrastructure facilities and public platforms for science and technology." - in "CGTN", 22 January 2019.

Avoiding another Tiananmen

"Watching Chinese politics is like reading tea leaves — you're always trying to read between the lines of what is being said. "The Chinese Communist Party never raises alarm. They never say that things are bad. They always indicate that they are in control."

Always at the back of the CCP's mind was the need to avoid the possibility of another Tiananmen Square, he said, where 1989 pro-democracy protests were violently quashed." - in "ABC News", 22 January 2019.

March 2019

"Hong Kong protesters made history in 2019.
In March 2019 the government of Hong Kong proposed a bill that would have allowed extraditions to mainland China." *- in "Amnesty International", 25 September 2019.*

Chinese Whispers of the Communist Regime Dictatorship - 31 December 2019

"Recently, some medical institutions found that many **Pneumonia** cases received were related to South China Seafood City. After receiving the report, the Municipal Health and Health Commission immediately carried out case searches and retrospective investigations related to South China Seafood City in medical and health institutions in the city. At present, a total of 27 cases have been found, 7 of which are in serious condition, and **the remaining cases are in stable and controllable condition, 2 cases have improved and are scheduled to be discharged in the near future. The clinical manifestations of the cases were mainly Fever, a few patients had Dyspnea, and chest radiographs showed infiltrating lesions in both lungs.**

Wuhan City organized consultations with clinical medicine, **Epidemiology, and Virology experts from Tongji Hospital, Provincial Center for Disease Control, Wuhan Institute of Virology, Chinese Academy of Sciences, Wuhan Infectious Disease Hospital, and Wuhan Center for Disease Control and Prevention (CDC China).**

So far, no obvious human-to-human transmission has been found in the investigation, and no infection among medical staff has been found.

The detection of the pathogen and the investigation of the cause of the infection are currently underway.

Viral **Pneumonia is more common in winter and spring, and can be sporadic or outbreaks. The main clinical manifestations are Fever, Body Aches, a small number of Dyspnea, and lung infiltration. The disease is preventable and controllable. The clinical treatment is mainly symptomatic, requiring bed rest.**" - in "Wuhan Municipal Health, and Health Commission's briefing on the current situation of Pneumonia in our city", Release Agency: Wuhan Municipal Health Commission, Time: 13:38:05, wjw.wuhan.gov.cn/front/web/showDetail/2019123108989, 31 December 2019.

The Creation of A "Pandemic" To Curb Hong Kong Independence Movement

26 December 2019

"Here we study **a single patient who was a worker at the market and who was admitted to the Central Hospital of Wuhan on 26 December 2019 while experiencing a severe respiratory syndrome that included Fever, Dizziness and a Cough."** - in "A new coronavirus associated with human respiratory disease in China", Nature, 7 January 2020.

31 December 2019

"The Centre for Health Protection (CHP) of the Department of Health is today (31 December 2019) closely monitoring a cluster of **Pneumonia** cases in Wuhan, Hubei Province, and has contacted the National Health Commission for further information.

According to an announcement from the Health Commission of Hubei Province, a number of **Pneumonia** cases related to a local seafood market was recently reported in Wuhan.

The Wuhan Municipal Health Commission has commenced investigation and so far identified 27 cases.

Among them, 7 cases were serious and the remaining were stable.

Symptoms were mainly Fever while a few had presented with Shortness of Breath.

All patients are isolated and receiving treatment.

Contact tracing of close contacts and medical surveillance are ongoing.

The Wuhan Municipal Health Commission announced that assessment by relevant experts revealed that the cases were compatible with viral **Pneumonia**.

For the time being, **no obvious human-to-human transmission has been observed and no healthcare workers have been infected.**

The causative pathogen and cause of infection are still under investigation.

Locally, while surveillance, prevention and control measures are in place, the **CHP will remain vigilant and work closely with the World Health Organization and relevant health authorities to monitor the latest developments.**

The CHP's Port Health Division conducts health surveillance measures at all boundary control points.

The CHP will continue to closely monitor the latest situation of the cluster of pneumonia cases in Wuhan and update the surveillance criteria and testing strategies accordingly." - in " Centre for Health Protection of the Hong Kong Special Administrative Region Government CHP provides further information on cluster of pneumonia cases in Wuhan", Government of Hong Kong, 31 December 2019.

Report of A Pandemic Based Upon One (1) Case of Pneumonia in the Middle of Winter, From A Country With A Population of 1.4 Billion 2019

"Here we study **a single patient** who was a worker at the market and who was admitted to the Central Hospital of Wuhan on 26 December 2019 while experiencing a **severe respiratory syndrome that included Fever, Dizziness and a Cough.** The patient studied was a 41-year-old man.

He was admitted to and hospitalized in the Central Hospital of Wuhan on 26 December 2019, 6 days after the onset of disease. The patient reported **fever, chest tightness, unproductive cough, pain and weakness** for 1 week on presentation. **Epidemiological investigations by the Wuhan Center for Disease Control and Prevention (CDC-China)**, revealed that the patient worked at a local indoor seafood market. **No bats were available for sale."** - in "A new coronavirus associated with human respiratory disease in China", Nature, 7 January 2020.

"We report a novel CoV (2019-nCoV) that was identified in hospitalized patients in Wuhan, China, in December 2019 and January 2020.

Evidence for the presence of this virus includes identification in bronchoalveolar-lavage fluid in **3 patients** by **whole-genome sequencing, direct PCR,** and culture.

The primer sets and standard operating procedures have been shared with the World Health Organization, and are intended for surveillance and detection of 2019-nCoV infection Globally and in China.

Although our study does not fulfill Koch's Postulates, our analyses provide evidence implicating 2019-nCoV in the Wuhan outbreak." - in "A Novel Coronavirus from Patients with Pneumonia in China, 2019", N. Engl. J. Med., 20 February 2020.

Pneumonia In Winter

"By 2 January 2020, 41 admitted hospital patients were identified as laboratory-confirmed 2019-nCoV infection in Wuhan.

20 [49%]) of the 2019-nCoV-infected patients were aged 25–49 years, and 14 (34%) were aged 50–64 years.

The median age of the patients was 49·0 years (IQR 41·0–58·0).

In our cohort of the first 41 patients as of 2 January **no children or adolescents were infected.**

Of the 41 patients, 13 (32%) were admitted to the ICU because they required high-flow nasal cannula or higher-level oxygen support measures to correct hypoxaemia.

Most of the infected patients were men; **less than half had underlying diseases (13 [32%]), including diabetes (eight [20%]), hypertension (6 [15%]), and cardiovascular disease (6 [15%]).**

The symptom onset date of the first patient identified was 1 December 2019.

None of his family members developed fever or any respiratory symptoms.

No epidemiological link was found between the first patient and later cases.

The first fatal case, who had continuous exposure to the market, was admitted to hospital because of a 7-day history of **Fever, Cough, and Dyspnoea.**

The most common symptoms at onset of illness were Fever (40 [98%] of 41 patients), Cough (31 [76%]), and Myalgia or Fatigue (18 [44%]); less common symptoms were sputum production (11 [28%] of 39), headache (3 [8%] of 38), haemoptysis (2 [5%] of 39), and diarrhoea (1 [3%] of 38).

More than half of patients (22 [55%] of 40) developed dyspnoea." - in "Clinical features of patients infected with 2019 novel coronavirus in Wuhan, China", Lancet, 24 January 2020.

The Time Line of the Covid-19 "Pandemic" Fraud

1 December 2019

"The symptom onset date of the First Patient Identified was 1 December 2019." - in "Clinical features of patients infected with 2019 novel coronavirus in Wuhan, China", Lancet, 24 January 2020.

31 December 2019

"On 31 December 2019, WHO was informed of a cluster of cases of Pneumonia of Unknown Cause detected in Wuhan City, Hubei Province of China.

In addition to providing care to patients and isolating new cases as they are identified, Chinese public health officials have reported that they remain focused on continued contact tracing, conducting environmental assessments at the wholesale market, and investigations to identify the pathogen causing the outbreak.

WHO is closely monitoring this event and is in active communication with counterparts in China.

In line with standard protocols for any public health event, an incident management system has been activated across the 3 levels of WHO (country office, regional office and headquarters) and the Organization is prepared to mount a broader response, if needed." - in "Novel Coronavirus (2019-nCoV)", WHO, 31 December 2019.

3 January 2020

"On 31 December 2019, the WHO China Country Office was informed of cases of pneumonia unknown etiology (unknown cause) detected in Wuhan City, Hubei Province of China.

From 31 December 2019 through 3 January 2020, a total of 44 case-patients with Pneumonia of unknown etiology were reported to WHO by the national authorities in China.

During this reported period, **the causal agent was not identified." - in "Zika Virus, Novel Coronavirus (2019-nCoV) Situation Report-1", WHO, 21 January 2020.**

7 January 2020

"The Chinese authorities identified a new type of coronavirus, which was isolated on 7 January 2020." - in "Zika Virus, Novel Coronavirus (2019-nCoV) Situation Report-1", WHO, 21 January 2020.

9 January 2020

"Chinese authorities have made a preliminary determination of a novel (or new) coronavirus, identified in a hospitalized person with pneumonia in Wuhan.

Chinese investigators conducted gene sequencing of the virus, using an isolate from one positive patient sample.

Preliminary identification of a novel virus in a short period of time is a notable achievement and demonstrates China's increased capacity to manage new outbreaks.

Initial information about the cases of pneumonia in Wuhan provided by Chinese authorities last week – including the occupation, location and symptom profile of the people affected – pointed to a coronavirus (CoV) as a possible pathogen causing this cluster.

Chinese authorities subsequently reported that laboratory tests ruled out SARS-CoV, MERS-CoV, Influenza, Avian Influenza, Adenovirus and other common respiratory pathogens.

Coronaviruses are a large family of viruses with some causing less-severe disease, **such as the Common Cold,** and others more severe disease such as MERS and SARS.

Some transmit easily from person to person, while others do not.

As surveillance improves more coronaviruses are likely to be identified.

China has strong public health capacities and resources to respond and manage respiratory disease outbreaks.

In addition to treating the patients in care and isolating new cases as they may be identified, **public health officials remain focused on continued contact tracing,** conducting environmental assessments at the seafood market, and investigations to identify the pathogen causing the outbreak.

The preliminary determination of a Novel Virus will assist authorities in other countries to conduct disease detection and response." - in "WHO Statement Regarding Cluster of Pneumonia Cases in Wuhan, China", WHO, 9 January 2020.

10 January 2020

"The Shanghai Public Health Clinical Center & School of Public Health, in collaboration with the Central Hospital of Wuhan, Huazhong University of Science and Technology, the Wuhan Center for Disease Control and Prevention, the National Institute for Communicable Disease Control and Prevention, **Chinese Center for Disease Control, and the University of Sydney, Sydney, Australia is releasing a coronavirus genome from a case of a respiratory disease from the Wuhan outbreak.**

The sequence has also been deposited on GenBank (accession MN908947 34.6k).

Please feel free to download, share, use, and analyze this data.

We ask that you communicate with us if you wish to publish results that use these data in a journal.

If you have any other questions – then please also contact us directly." - Professor Yong-Zhen Zhang, Shanghai Public Health Clinical Center & School of Public Health, Fudan University, Shanghai, China, in "Novel 2019 coronavirus genome SARS-CoV-2 coronavirus, Virological, 10 January 2019.

21 January 2020

The Invention of the "Covid-19" PCR Test From Thin Air

"In the present case of **2019-nCoV, virus isolates or samples from infected patients HAVE SO FAR NOT BECOME AVAILABLE** to the international public health community.

We report here on the establishment and validation of a diagnostic workflow for 2019-nCoV screening and specific confirmation, designed IN ABSENCE of available Virus isolates or original patient specimens.

Design and validation were enabled by the close genetic relatedness to the 2003 SARS-CoV, and aided by the use of synthetic nucleic acid technology." - Dr **Christian Drosten**, Charité Universitätsmedizin Berlin Institute of Virology, Berlin, Germany and German Centre for Infection Research (DZIF), Berlin, Germany, in "Detection of 2019 novel coronavirus (2019-nCoV) by real-time RT-PCR", Eurosurveillance, **Article submitted on 21 January 2020.**

Participants: It Is Entirely Valid To Use Metagenomic Sequences in Virus Taxonomy in The Absence of An Isolate or Direct Biological Data Such As Visualization of Viral Particles or Detection of Signs or Symptoms of Disease

"A workshop funded by the Wellcome Trust (UK) **to discuss frameworks for advancing viral taxonomy in the age of metagenomics was convened in Boston, MA, USA from 9-11 June 2016.**

Participants had wide-ranging expertise in viral genomics, metagenomic environmental studies, and virus classification (13 of the 26 participants were members of the International Committee on Taxonomy of Viruses (ICTV) Executive Committee) and based on data

presentations and wide-ranging discussions set out to develop a series of expert proposals for future consideration by the ICTV Executive Committee.

The understanding in the workshop was that **the term metagenomic applies to any viral sequence that lacks biological or other experimental characterization,** although what a 'lack' means in practice has varied in the literature.

Sequence data are already of paramount importance in viral taxonomy because they currently provide the only reliable means of representing evolutionary relationships at the required granularity; however, the workshop recognized that the data generated by high-throughput sequencing from environmental samples pose major challenges, particularly because increasingly powerful methods are generating overwhelming amounts of such **data, which are linked to little or no biological information.**

The workshop participants concluded that it is entirely valid to use metagenomic sequences in virus taxonomy in the absence of an isolate or direct biological data, such as visualization of viral particles or detection of signs or symptoms of disease.

A set of proposals was developed and are discussed in the c**onsensus** Statement article published in Nature Reviews Microbiology.

These proposals were subsequently endorsed by the ICTV Executive Committee." - in "**Metagenomic sequencing** and its impact on virus classification", International Committee on Taxonomy of Viruses, 9 June 2016.

4 September 2020

No Paper Which Purified Isolated Covid-19

"I am not aware of a paper which purified isolated SARS-CoV-2.

Hence it cannot be concluded with any confidence that the so-called COVID-19 PCR-Tests were specifically calibrated to a brand new viral pathogen." - Dr Michael Laue, Electron Microscopy, Consultant Laboratory for Diagnostic Electron Microscopy of Infectious Pathogens, Robert Koch Institute, in "e-mail", 4 September 2020.

Scientists From Institute of Virology At Charité Among The Most Influential Researchers Worldwide In 2022

"3 Scientists from Charité's Institute of Virology are among the "Who's Who" of the world's most influential researchers of 2022, according to the list of Highly Cited Researchers published this week by the company Clarivate.

It lists the 1% of researchers whose work is most cited internationally.

How often a scientist's scientific work is cited by peers is considered a measure of his or her influence in the field.

Prof. Dr. Christian Drosten, Director of the Institute, is listed for the 5th time, in both Immunology and Microbiology, as he was in 2021.

This makes him one of only 219 researchers in the world to have a significant impact on two disciplines this year.

Prof. Drosten is head of the Coronavirus Consiliary Laboratory at Charité, scientific director of the interdisciplinary center Charité Global Health, spokesman of the National Research Network Zoonotic Infectious

Diseases and member of the Leopoldina. A scientist at the German Center for Infection Research (DZIF), his research focuses primarily on the evolution and diversity of viruses, especially coronaviruses, and the origin of viral pathogens from animals.

As Deputy Head of the Coronavirus Consiliary Laboratory, Dr. Victor Corman co-developed the first PCR test for SARS-CoV-2 and is a key contact for expert advice on coronavirus diagnostics in Germany.

The DZIF scientist, now listed for the third time, heads a junior research group in infection research funded by the German Federal Ministry of Education and Research (BMBF).

In addition to the further development of diagnostic methods, his work also focuses on the epidemiology and evolution of respiratory and zoonotic RNA viruses.

Privatdozent Dr. Marcel A. Müller is one of the 3,244 people with special influence in an interdisciplinary field.

He heads the level 3 biosafety laboratory at the Institute of Virology of the Charité and studies the functional diversity of highly pathogenic coronaviruses such as SARS-CoV-2 and MERS-CoV, among others in a DFG-funded project in Kenya.

With support from the Volkswagen Foundation, **the DZIF scientist, who is among the top researchers for the third time, is investigating how coronaviruses alter the cellular recycling system for replication and comparing the innate immune response in humans and bats.**

The findings will help develop new antiviral and anti-inflammatory drugs." - in "Charité – Universitätsmedizin Berlin", 2023.

Chapter 2

La Frode

The Next Epidemic - 2017

"The Next Epidemic could originate on a super contagious and deadly strain of the Flu.

Epidemiologists say a fast-moving airborne pathogen could kill more than 30 Million people in less than a year.

And even if the Next Pandemic isn't on the scale of the 1918 flu, we would be wise to consider the social and economic turmoil that might ensue if something like Ebola made its way into a lot of major urban centers.

The good news is that with advances in Biotechnology, New Vaccines and drugs can help prevent epidemics from spreading out of control.

First and most importantly, **we have to build an arsenal of new weapons - Vaccines, Drugs, and Diagnostics.**

The cost of ensuring adequate Pandemic Preparedness Worldwide is estimated at $3.4 Billion a year.

Imagine if I told you that somewhere in this world, there's a weapon that exists - or that could emerge - **capable of bringing economies to a standstill, and throwing nations into chaos.**

I'm optimistic that a decade from now, we can be much better prepared for a lethal epidemic - **if we're willing to put a fraction of what we spend on defence budgets and new weapons systems into Epidemic Readiness.**" - Bill Gates, in "Munich Security Conference", 17 February 2017.

La Bugia

Covid Has Low Fatality Rate: A Disease Mainly of the Elderly Kind of Like Flu

"The fatality rate, you know, we didn't understand, that it's a fairly low fatality rate, and that it's a disease mainly of the elderly, kind of like Flu." *- Bill Gates, in "How to Prevent the Next Pandemic", 92Y,* ***3 May 2022.***

"The Next Epidemic could originate on a super contagious and deadly strain of the Flu.
Epidemiologists say a fast-moving airborne pathogen ***could kill more than 30 Million people in less than a year.***
And even if the Next Pandemic isn't on the scale of the 1918 Flu." *- Bill Gates, in "Munich Security Conference",* ***17 February 2017.***

Chapter 3

Il Imbroglione

A Surprise Disease Outbreak - 2017

"**Fauci has led the NIAID for more than 3 decades, advising the past 5 United States presidents on global health threats from the early days of the AIDS epidemic in the 1980s through to the current Zika virus outbreak**.

During a Forum on **Pandemic Preparedness** at Georgetown University, Fauci said:

> ***"The Trump Administration, will not only be challenged by ongoing Global Health threats such as Influenza, and HIV, but also a Surprise Disease Outbreak**." - Dr Anthony Fauci, MD*

Dr Fauci and other health experts said: "**that preventing disease pandemics often starts overseas and that a proper response means collaboration between not only the U.S. and other countries, but also the Public and Private Health Sectors.**

> ***"We will definitely get surprised in the next few years!**" - Dr Anthony Fauci, MD*

He said." - in "Fauci: "**No Doubt" Trump will face Surprise Infectious Disease Outbreak"**, Healio - Infectious Diseases News, 11 January 2017.

Chapter 4

Il Dolo

Next Pandemic Will Probably Emerge From Bats - 2018

"I think the chances that the Next Pandemic will be caused by a novel virus are quite good.

One not-so-surprising finding was that the next pandemic will probably emerge from bats.

No one knows why, but bats are absolutely riddled with nasty viruses.

They're known to be the source of many, many human pandemics, including Sars, which we picked up from cave-dwelling bats in China, as well as Ebola.

But there are others, and some have the capacity to be even deadlier." - Kevin Olival, Disease ecologist from the **EcoHealth Alliance**, in "The mystery viruses far worse than flu", Future, BBC, 14 November 2018.

Chapter 5

Il Raggiro

It Probably Comes From Bats - 2018

"I mentioned SARS Epidemic in Hong Kong.

And **Hong Kong** illustrates what we are going to increasingly be confronted with, and that is very high density populations, dense populations like in Mong Kok, for those of you have been in **Hong Kong**, is the most densely populated place on earth.

And that's where the SARS Virus, which is a Coronavirus is a whole family a new family that we know and it probably comes from Bats." - Dr Peter Piot, MD in **"Are We Ready for the Next Pandemic?", 29 June 2018**.

Chapter 6

Il Broglio

Coronavirus Outbreaks Will Originate From Bats, Increased Probability That This Will Occur In China – March 2019

"During the past 2 decades, 3 zoonotic Coronaviruses have been identified as the cause of large-scale disease outbreaks-Severe Acute Respiratory Syndrome (SARS), Middle East Respiratory Syndrome (MERS), and Swine Acute Diarrhoea Syndrome (SADS).

They have common characteristics, such as they are all highly pathogenic to humans or livestock, their agents originated from bats, and 2 of them originated in China.

Thus, **it is highly likely that future SARS, or MERS, like Coronavirus outbreaks will originate from bats, and there is an increased probability that this will occur in China."** - Yi Fan, CAS Key Laboratory of Special Pathogens and Biosafety, Wuhan Institute of Virology, Chinese Academy of Sciences, Wuhan; Kai Zhao, CAS Key Laboratory of Special Pathogens and Biosafety, Wuhan Institute of Virology, Chinese Academy of Sciences, Wuhan; Zheng-Li Shi, CAS Key Laboratory of Special Pathogens and Biosafety, Wuhan Institute of Virology, Chinese Academy of Sciences, Wuhan; Peng Zhou, CAS Key Laboratory of Special Pathogens and Biosafety, Wuhan Institute of Virology, Chinese Academy of Sciences, Wuhan, in "Bat Coronaviruses in China", Viruses, 2 March 2019.

Bat Was Never A Food Source And No Bat Was Traded In The Market

Please Note: **Bats Are in Hibernation in Winter.**

"The seafood market, is in a densely-populated district of Wuhan, a metropolitan of 15 Million people.

The probability was very low for the bats to fly to the market. According to municipal reports, and the testimonies of 31 residents and 28 visitors, the **bat was never a food source in the city, and no bat was traded in the market."** - Professor Botao Xiao, Joint International Research Laboratory of Synthetic Biology and Medicine, School of Biology and Biological Engineering, South China University of Technology, and School of Physics, Huazhong University of Science and Technology; Dr Lei Xiao, Tian You Hospital, Wuhan University of Science and Technology, China, in "The possible origins of 2019-nCoV Coronavirus", 14 March 2020.

November 2017

5 Year Surveillance of Coronavirus in a Cave Inhabited By Bats in China

"A large number of SARS-related Coronaviruses (SARSr-CoV) have been detected in horseshoe Bats since 2005 in different areas of China.

However, these bat SARSr-CoVs show sequence differences from SARS coronavirus (SARS-CoV) in different genes (S, ORF8, ORF3, etc), and are considered unlikely to represent the direct progenitor of SARS-CoV.

We report the findings of our 5-year surveillance of SARSr-CoVs in a cave located approximately 60 km from the city of Kunming, inhabited by multiple species of horseshoe bats in Yunnan Province, China.

Virus Isolation

The Vero E6 cell line was kindly provided by Australian Animal Health Laboratory, CSIRO (Geelong, Australia).

Vero E6 monolayer was maintained in DMEM medium supplemented with **10% fetal calf serum** (FCS).

Fecal samples (in 200 μl buffer) were gradient **centrifuged** at 3,000–12,000 g, and the supernatant was diluted 1:10 in DMEM before being added to Vero E6 cells.

After incubation at 37°C for 1 h, the inoculum was removed and replaced with fresh DMEM medium with 2% FCS. The cells were incubated at 37°C and checked daily for cytopathic effect.

All tissue culture media were supplemented with triple antibiotics penicillin/ streptomycin/amphotericin (Gibco) (penicillin 200 IU/ml, streptomycin 0.2 mg/ml, amphotericin 0.5 μg/ml).

Three blind passages were carried out for each sample.

After each passage, both the culture supernatant and cell pellet **were examined for presence of SARSr-CoV by RT-PCR** using specific primers targeting the RdRp or S gene." - in "Discovery of a rich gene pool of bat SARS-related coronaviruses provides new insights into the origin of SARS coronavirus", PLoS Pathog., November 2017.

Funding Statement:

This work was jointly funded by **National Natural Science Foundation of China (81290341, 31621061) to ZLS, China Mega-Project for Infectious Disease (2014ZX10004001-003) to ZLS;**

Scientific and technological basis special project (2013FY113500) to YZZ and ZLS from the **Ministry of Science and Technology of China;**

Strategic Priority Research Program of the Chinese Academy of Sciences (XDPB0301) to ZLS;

National Institutes of Health (NIAID R01AI110964);

USAID Emerging Pandemic Threats (EPT) PREDICT program to PD and ZLS, CAS Pioneer Hundred Talents

Program to JC, NRF-CRP grant (NRF-CRP10-2012-05) to LFW and WIV "One-Three-Five" Strategic Program (WIV-135-TP1) to JC and ZLS.

I Would Like To See Scientists Demonstrate In The Lab That Human Coronavirus Can Jump From Bats To Another Animal

"Changchun Tu, a Virologist who directs the OIE Reference Laboratory for Rabies in Changchun, China, says **the results are only "99%" persuasive.**

He would like to see Scientists Demonstrate in the Lab that the human SARS strain can Jump from Bats to another Animal, such as a civet.

"If this could have been done, the evidence would be perfect."

Another question is how a Virus from Bats in Yunnan could travel to animals and humans around 1,000 Kilometres away in Guangdong, without causing any suspected cases in Yunnan itself.

That "has puzzled me ", says Tu.

Cui and Shi are searching for other bat populations that could have produced strains capable of infecting humans." - in "Bat cave solves mystery of deadly SARS virus-and suggests new outbreak could occur", Nature, 1 December 2017.

Chapter 7

La Truffa

We Need To Make A Billion Doses Next Year There Is Going To Be A Pandemic - 2019

"So the great news versus 2020, where we are today, is we have Manufacturing Capacity, as Seth knows, when the pandemic happened more than I had made a hundred thousand doses in 2019 for the whole year.

And I remember walking after that, I was into the office of my other manufacturing, and I said: "How we make a billion doses next year", and you look at me a bit funny..., say what?

I said: "Yeah, we need to make a billion doses Next Year there's gonna be a Pandemic." - Stéphane Bancel, CEO of Moderna, in "Davos Live: Moderna and Gavi CEOs at World Economic Forum, 'State of the Pandemic' Session", Reuters, Streamed live, 18 January 2023.

Chapter 8

Remarkable & Accurate German Prophecy on the Covid-19 "Pandemic"

Germany Made 1 Pandemic Exercise "Pandemic Caused by Virus Modi-SARS" 2012

"When does the event happen?

The event begins in Asia in February, but its dimension/significance is only recognized there a few weeks later.

The first identified Modi-SARS case occurs in Germany in April.

This point in time forms the starting point of the present scenario.

What triggers the event?

The pathogen comes from Southeast Asia, where the pathogen, which occurs in wild animals, was transmitted to humans via markets.

Since the animals themselves do not become ill, it was not apparent that there was a risk of infection." - in "Bericht zur Risikoanalyse im Bevölkerungsschutz 2012", Federal Ministry of the Interior, Deutscher Bundestag, 10 December 2012.

A Trans-Humanistic Era

"By 2050, a New Form of Human - a Trans-Human - will emerge, where Information and Communications Technologies and Bio-Medicine will fundamentally improve the human condition and greatly enhance human intellectual, physical, and psychological capacities.

Human beings' cognitive and intellectual abilities will be augmented through Technological Implants, such as memory and energy storage.

Systems

The matrix is no longer fiction!

In 2050 the internet will connect bits and atoms at the speed of light.

Its algorithms will orchestrate zillions of smart objects, which will share zettabytes of data every day, thus bridging the physical and virtual worlds instantaneously." - in "Digital Futures Final Report- A journey into 2050 visions and policy challenges", Innovation4EU, European Commission, 29 March 2016.

The Covid-19 Pandemic Has Been An Unanticipated Accelerator Towards The Fourth Industrial Revolution

"We are in the era of the Fourth Industrial Revolution, which is characterized by the convergence and complementarity of emerging technology domains, including nanotechnology, biotechnology, new materials and advanced digital production technologies.

Despite the challenges posed by the disruptive nature of these innovations — which are increasingly connecting objects, machines, people and the environment — the digital transformation presents opportunities for inclusive and sustainable development.

This publication describes the digital transformation process and provides insights into its key drivers and the implications for sustainable development, particularly

for the 5 dimensions addressed by the Sustainable Development Goals — people, prosperity, planet, peace (governance) and partnerships.

While revolutions and change have marked human development, what distinguishes the Fourth Industrial Revolution from previous industrial revolutions is the parallel technological breakthroughs within and across the digital, biological and physical spheres.

The complexity and rapid pace of change of the Fourth Industrial Revolution also make the revolution distinctive.

Moreover, the Covid-19 Pandemic has been an unanticipated accelerator to the pace of change and structural shift towards the Fourth Industrial Revolution and the adoption of new technologies.

The Sustainable Development Goals sit at the heart of the 2030 Agenda for Sustainable Development and guide global, regional and national development endeavours until 2030.

Their achievement will be significantly impacted by the rapid change brought about by digital transformation to production, the economy, the environment and society.

The digital transformation is in full swing and although little mention is made to it or digital technologies in the 2030 Agenda, it has the potential to be shaped to promote sustainability for the benefit of all parts of society." - in "Standards & Digital Transformation – Good Governance in a Digital Age", Industrial Development Organization, United Nations, 14 October 2021.

Networking Nano-Biosensors for Wireless Communication in the Blood

"Biological computing machines, such as micro and nano-implants that can collect important information inside the human body, are transforming medicine.

Yet, networking them for communication has proven challenging.

A global team, including Ecole Polytechnique Federale de Lausanne researchers, have developed a protocol that enables a molecular network with multiple transmitters.

First, there was the Internet of Things (IoT) and now, at the interface of computer science and biology, the Internet of Bio-Nano Things (IoBNT) promises to revolutionize Medicine and health care.

The IoBNT refers to biosensors that collect and process data, nano-scale Labs-on-a-Chip that run Medical Tests inside the body." - in "Networking nano-biosensors for wireless communication in the blood, 22 November 2023.

School Closure and Social Distancing

"The 2009 A/H1N1 influenza pandemic generated additional data and triggered new studies that opened debate over the optimal strategy for handling a pandemic.

This study helps to shed light on the cost-utility of various interventions, and may support decision making, among other criteria, for future pandemics.

School closure is one of the few measures that the studies found to possibly not be cost-effective, especially for a less severe pandemic in which costs would be above $200,000 per QALY.

Although the studies generally agree that the measure is effective in reducing the overall attack rate, which was higher among children for H1N1, the lost working days of

parents from taking care of their children and loss of education account for a substantial portion of the costs.

A school closure of 1 to 4 weeks produces only a modest effect on the epidemic, whereas extending the closure to 8 weeks significantly decreases the number of cases but at the expense of vastly increased costs.

Even for higher fatality pandemics, it seems that school closure may exhibit a net cost.

However, limited school closure in combination with antiviral treatments and other social-distancing policies has often been regarded as an optimum strategy in multiintervention studies.

Indeed, schools and workplaces are big vectors for transmitting disease, creating opportunities for cost-effective social-distancing policies (e.g., using remote teaching and working or facemasks).

Studies have also suggested that adult and child social distancing (meaning voluntarily staying home) is more cost-effective than closing schools, with increased cost-effectiveness if a high percentage of the population complies.

However, analogous to the case of isolating exposed persons during a disease's contact-tracking phase, **it seems unrealistic that all citizens would comply with self-isolation.**

The less severe the infection, the less people will agree to stay home when sick unless a change in behavior is induced by targeted campaigns and corporate policies." - in "Value for Money in H1N1 Influenza: A Systematic Review of the Cost-Effectiveness of Pandemic Interventions", Value in Health, June 2017.

The Covid-19 Pandemic Has Been an Unanticipated Accelerator to the Pace of Change and Structural Shift Towards the Fourth Industrial Revolution

"We are in the era of the Fourth Industrial Revolution (4IR), which is characterized by the convergence and complementarity of emerging technology domains, including nanotechnology, biotechnology, new materials and advanced digital production technologies.

Despite the challenges posed by the disruptive nature of these innovations — which are increasingly connecting objects, machines, people and the environment — the digital transformation presents opportunities for inclusive and sustainable development.

This publication describes the digital transformation process and provides insights into its key drivers and the implications for sustainable development, particularly for the five dimensions addressed by the Sustainable

Development Goals (SDGs) — people, prosperity, planet, peace (governance) and partnerships.

While revolutions and change have marked human development, what distinguishes the 4IR from previous industrial revolutions is the parallel technological breakthroughs within and across the digital, biological and physical spheres.

The complexity and rapid pace of change of the 4IR also make the revolution distinctive.

Moreover, the COVID-19 pandemic has been an unanticipated accelerator to the pace of change and structural shift towards the 4IR and the adoption of new technologies.

The SDGs sit at the heart of the 2030 Agenda for Sustainable Development and guide global, regional and national development endeavours until 2030.

Their achievement will be significantly impacted by the rapid change brought about by digital transformation to production, the economy, the environment and society.

The digital transformation is in full swing and although little mention is made to it or digital technologies in the 2030 Agenda,, it has the potential to be shaped to promote sustainability for the benefit of all parts of society." - in "STANDARDS & DIGITAL TRANSFORMATION", United Nations Industrial Development Organization (UNIDO), United Nations, 2021.
